# PRODUCTION STATS

## Colville River

Landowner:	State   Federal   Native
Operator:	ConocoPhillips Alaska
Discovered:	1994
First Production:	2000
Total Output:	636 million BOE
Oil Wells:	144
Average Output:	25,000 BOE/day

Ownership Interest: **100% ConocoPhillips Alaska**

Also called Colville Delta or simply Alpine after the unit's flagship Alpine field, a centralized production facility enables extended development into the National Petroleum Reserve - Alaska. Includes satellite fields Fiord West Kuparuk and Nanuq. Drilling pad CD2 tapped the Qannik pool in 2008. The CD5 pad began producing in 2015 from Native leases. The Doyon 26 rig set a record in 2022 for longest horizontal well drilled on land, 35,526 feet, at the Fiord West Kuparuk satellite field.
