First Production:	1985
Total Output:	399 million BOE
Oil Wells:	246
Average Output:	39,500 BOE/day

Ownership Interest: **100% Hilcorp Alaska**

The third North Slope field was developed by Conoco in the mid-'80s, and BP took over as operator in 1994. A pipeline sends oil from a central pad south to the pipe that connects the Kuparuk River unit to Pump Station 1 at Prudhoe Bay. Hilcorp bought a 50 percent interest in 2014 before acquiring BP's half in 2018.
