# PRODUCTION STATS

## Point Thomson

Landowner:	State
Operator:	ExxonMobil Alaska
Discovered:	1975
First Production:	2016
Total Output:	15 million BOE
Oil Wells:	1
Average Output:	8,400 BOE/day

Ownership Interest: ~62% ExxonMobil Alaska  
~37% Hilcorp Alaska | ~1% Other

Contains about one-quarter of known North Slope gas reserves. A 22-mile pipeline transports natural gas condensate to the Badami pipeline, with total production of 276 million cubic feet, vastly more than fields of comparable age like Nikaitchuq or Greater Mooses Tooth. The unit contains an estimated 200 million BOE of recoverable reserves.
