The field is better known by its unit name, Cosmopolitan. Discovered by Pioneer Natural Resources but idle for 2008 and 2009. Buccaneer took over in 2012, and then BlueCrest Energy gained control in 2014, deploying innovative "fishbone" extended reach wells from onshore. The oil reservoir is thought to lie under gas pockets not easily accessible from shore. The unit also includes the Starichkof field discovered by Pennzoil in 1967 but never developed.
