

COOK INLET LEAGUE

*North Cook  
Inlet*

1969

# PRODUCTION STATS

## North Cook Inlet

Landowner:	State
Operator:	Hilcorp Alaska
First Production:	1969
Wells:	16
Oil Output (2023):	-
Gas Output (2023):	12.3 BCF
Peak Production:	2001

Ownership Interest: **100% Hilcorp Alaska**

Home to the Tyonek A platform, connected by a Harvest Alaska gas pipeline to West Cook Inlet; a Hilcorp pipeline doubles back to shore north of Nikiski. Phillips Petroleum first tapped the Tertiary gas pool. The most productive well, A-13, started in 1993 and quit in 2006. In the meantime, ConocoPhillips took over, and Hilcorp has operated the unit since 2016. Hilcorp proposed two new wells targeting Beluga sands.
