Ownership Interest: **100% Hecla Mining Company**

---

Where is the largest silver mine in the United States? Inside a sliver of the City and Borough of Juneau on Admiralty Island. The US Forest Service granted Idaho-based Hecla Mining a permit to operate inside a national monument. Since mining began, Greens Creek has grown into the fifth largest silver mine in the world. The largest employer in Southeast is also Juneau's largest taxpayer. As one of the world's lowest-cost primary silver mines, it is also a cash flow generator for Hecla.
